25 YEARS LATER

Water, wind, body, equipment.

The parameters are still the same.

It's like having a blank sheet in front of you, and you can play with them to create your own canvas.

Freedom of expression starts to flow and you truly become part of a special universal order.

There is nothing like it, so simple yet so complete.

Water has endless rides to offer .

Enjoy. Respect. Share.

25 years have passed, at the speed of 25 summers.

A stylized, handwritten signature in white ink, consisting of the letters 'RRP' followed by a horizontal line and a small dot.The RRP logo, featuring the letters 'RRP' in a bold, italicized, sans-serif font, with a horizontal line through the middle of the letters.

A dream come true...

LONG SUP

This is a fantastic board for our longboarding surf fans that have converted over to SUP! The 3 x new shapes have evolved to a slightly thicker profile but keeping the rails as thin as possible. The additional volume brings in a more accessible approach when going through the line up and helps catching more waves without sacrificing manouverability. Enjoy the pleasure of catching all the waves and learn how to ride a longboard with a paddle in your hand. Noseriding will be a cherry on the pie.

- **Straight rocker to catch any waves**
- **Flat deck to allow precise foot positioning**
- **For riders who love a “Classic Style”**

OLLIE LADDI- MAN

RHOSN- EIGR SESSION

North Wales

"The RRD LongSUP is spot on for any condition, solid construction gives confidence in big waves as well as the small one! This board shreds in anything from knee to just over head high! I love the way it carves through turns and holds steady for a cheeky hang 5, perfect for my home break at Rhosneigr! "

COSMO

A line entirely developed looking for a specific SUP Wave board to ride in the critical section of the wave: very maneuverable and sharp, but with a generous floatation. A wide outline for easy paddling, but with thin mid section rails for sharp bite, lots of rocker for quick turns, and a wide nose with a very thin rail profile to allow easy wave catching and create a good volume distribution balance. The cosmo sup is the perfect tool for surf access and progression in choppy and glassy waves condition.

- **Wide round outline, easy to paddle in waves**
- **V shape on the tail to ease rail to rail changes**
- **For riders who want to improve in surf**

WASSUP

The Wassup Y25 is our specific development on all-round, easy to ride SUP boards. It's characterized with its equal "magic" width of 31" or 78 cms on all the boards. Since the introduction of this line in the market the Wassup boards are synonymous of accessible, fun supping with the additional value of a mastfoot to ride with a windsurfing sail on. Wassup stands for "Windsurf AS SUP". The Wassup Y25 is a great allround freeride sup board. It's a stable and fast to accelerate, while being the perfect board to progress into windsurfing for the first time. The best board to enjoy water at 360°.

- **Our first SUP shape. Unchanged reliability**
- **31"wide on all Sizes. The perfect width for paddleboards**
- **For all type of riders, most used shape since day 1**

"The new Razzle Dazzle 21,5 is the fastest board we have ever ridden. It is the best choice for flat water racing but thanks to its deep dugout shape and the concave bottom it is a suitable board even for open ocean races. The re-distributed volume helps us to control the balance and find the perfect stability in bouy turns, surfing and downwind action. This board expresses its full potential on flat water where you can really feel the gliding, stroke after stroke. The big difference is made by the less effort you have to put in order to reach the top speed. Fast and smooth paddling is the key for a perfect feeling. During the last season we pushed the board to the limit competing in many international races against the best paddlers in the world and facing every kind of condition.

We got some good results in every weather, Susak jumped on the podium both in a flat race like Bilbao and in some downwind action like Santa Pola. Paolo has been fighting for the top spots of the ranking during the whole tour. Needless to say that this board helped us to reach the next level and to be able to compete at world class level race after race."

UP FOIL

HI-FLIGHT

The HI-FLIGHT allows a super easy approach to sup and windsurf foiling and progress further with controlled and accessible performance. Its bigger shape gives an extra stability when paddling or when using it with a windsurf sail. Intuitive and user friendly it guides you naturally on your way in the exhilarating world of foiling. The HI-FLIGHT is ideal to make you discover the extraordinary feeling of flying whether you are using it for sup or windfoiling.

- **Allows an easy approach to sup and ws foiling**
- **Marked beveled rails from nose to tail for smooth touchdowns**
- **Variable EVA grip texture/concave deck shape to find the correct position of your feet**

- A straight rocker line with a dead flat tail section, helps getting immediate speed
- Marked beveled edge. to keep momentum when foiling and reduce the impact resistance on touch downs
- A pronounced edge of the concave deck marks the limit of your front feet positioning when riding strapless
- Two US box slots for sup foiling and a deep tuttle box for windfoiling

POCKET ROCKET

The Pocket Rocket is an innovative and unique board for multi purpose foiling; only 180 cm in length, it is the most fun and accessible foil board we have tested . It helps foiling earlier, stays up foiling longer and with its 122 lts of volume, it perfectly floats when standing still. Not to mention the practical side of things while you pack up and load the gear in your car! The Pocket Rocket 180 fits inside the boot of any cars (even inside a Fiat Panda!).

- **Only 180 cm for superior foil rides and transport comfort**
- **From zero to hero WING FOIL Riders. Step on, start wingfoiling!**
- **For advanced SUP foil riders**

- Carry handle on the deck
- Special concave shape on the deck for a comfortable and performing strapless ride. A pronounced edge of the concave deck marks the limit of your front feet positioning when riding strapless.
- The EVA deck features a crocodile skin texture throughout and in correspondence with the correct rear foot position, you have a diamond groove texture, so you can feel the correct rear foot position.
- A deep tuttle Foil box for windfoiling and US box slots for sup and Wing foiling.

HYDROFOILS

UNIVERSAL KSH

PURE FREERIDE KITEFOIL/ SUP & SURF FOIL CONVERTIBLE INTO WINDHYDROFOIL

The Universal KSH-Alu set is the tool to enter the windless foil dimension. You can switch the use of this phenomenal set from Kite to Surf to SUP foiling without the need to change your hydrofoil! By using the Universal KSH, you will learn a new way to ride the ocean using a type of motion that was unexplored until today. The combination of a 75 cms mast, a moderate length fuselage of 76 cm creates the perfect balance and the foundation of this modern hydrofoil designed to work at lower speeds.

Now you can learn pumping on flat water or ground small swell.

The front wing is the engine of the whole system. Built with a mix of light weight and heat stabilized PU core on the sides and a full carbon center plate to connect it to the fuselage, this extra thick profile wing with a 82 cms wingspan will create the right lift to start foiling at 4 knots of speed! The rear wing is 52 cms wide and has a negative dihedral angle of 154°. This angled wing design improves the "pumping" ability of the foil. The new KSH FLIGHT ALU foil is delivered with a hull flat plate to be used on US boxes slots that allow a precise micrometric trim for your sessions. Welcome to the future of riding the ocean!

SURF, SUP and Kite foil only with ONE hydrofoil!

- **All terrain foil to start and quickly improve**
- **1500 sqcms front wing and negative dihedral rear wing to help pumping and turning**
- **Convertible into a multisport foil. One foil set to do it all!**

FEATURES

- Universal hybrid carbon front wing with thicker profile for unmatched stiffness and lightweight
- Universal hybrid carbon rear wing with negative dihedral (anhedral) design to avoid surface turbulences during turns. It also helps pumping the board with your feet.
- Wider and stiffer Universal ALU mast with extra internal wall thickness and reduced outside profile. The top combination for speed potential and superior control. The most evolved ALU mast in the market today.
- Plastic connector at the bottom of the mast allows it to fit to any fuselages from kite to surf foils, and by separating aluminum parts contact it avoids oxidation and corrosion typical when aluminum touches aluminum. Longer lifetime.
- KSH alu fuselage with extra wide head area to carry and support super wide wings (up to 120 cms wingspan and 3000 sqcms)
- Stainless steel (aisi 316) Helicoil threads on mast and fuselage for longest durability and easier to unscrew.
- Universal plate (removable). You can change to any mast length for perfect trim and skill level. Makes your packing more compact (no plate mounted sideways inside your bag) and allows to convert your connection into any board attachment system (4way screws, tuttle or powerbox to be converted into ws foil use).

Well known and respected surfer & shaper Ian Armstrong about designing and shaping the new RRD surf boards line:

"Surfing is life -the rest is details. If this is true then the details are in the equipment! Wave riding equipment has been my obsession since the beginning.

Teaming up with RRD I have created my dream quiver. Shapes that have come from years of riding all the different waves of Cape Town. Sometimes alone and sometimes with family and friends. Having fun and trying new shapes, trading insights on performance.

When Roberto asked me to put this line together it didn't take long to decide which shapes to use. It's just hard to decide which one is my favourite. My boards are a canvas for my art, painting is all about colour, shapes and proportion.

It's been so much fun having the freedom to create with RRD. All the shapes in the line have been tested and retested for years and there have been incredible moments. Airs, barrels and carves are all etched in my mind when I think of these shapes.

I am excited to put them out there and share the feeling".

**IAN ARMSTRONG
SURFIN' IS
LIFE... THE
REST IS DE-
TAILS**

6'1" x 19 3/4" x 2 3/4"	34,7	24HHA61

HUNGRY HYENA

SMALL WAVES THRUSTER

The Hungry Hyena is a small wave thruster. Fast, snappy and great for airs. It's ridden 2-3" shorter than your personal height. It has a single to double concave that runs into a 'V' off the tail. It has a flatter deck, wider outline and a low rocker.

SIZE (inch.)	VOL.	ART. CODE
5'7" x 18'3/8" x 2 1/4"	24,5	24CHA57
5'9" x 18'5/8" x 2 1/4"	25,5	24CHA59
5'11" x 18 7/8" x 2 3/8"	28,1	24CHA511

6'3" x 19 3/8" x 2 5/8"	33,7	24CHA63

CHEETAH

ALLROUND WAVE THRUSTER

The Cheetah can handle the drop and ride the tube. It surfs fluid and drivey. This board gives you control when the waves are good. Designed to match your height, this is a great all rounder, tackling a variety of conditions with ease. A slightly wider nose and tail straightens the outline, increasing speed while the bottom curve keeps you in the pocket.

SIZE (inch.)	VOL.	ART. CODE
5'5" x 18 7/8" x 2 1/4"	25,9	24BAA55
5'7" x 19 1/8" x 2 3/8"	29	24BAA57
5'9" x 19'1/2" x 2 3/8"	30,5	24BAA59
5'11" x 19 3/4" x 2 1/2"	33,4	24BAA511
6'1" x 20" x 2 1/2"	34,9	24BAA61

BABOON

ALLROUND WAVE QUAD

The Baboon is a quad with high performance capabilities. The deck is flat for stability while the rails are soft and forgiving. Paddles well and can handle bigger conditions as well as being a great tuberider. A really versatile board with a flattish rocker. Designed to be ridden 2-3" shorter than your height. It's fast and loose and good for all conditions.

SIZE (inch.)	VOL.	ART. CODE
5'0" x 19 1/2" x 2 1/4"	26	24LKFA50
5'2" x 19 3/4" x 2 3/8"	28,6	24LKFA52
5'4" x 20 1/2" x 2 3/8"	30	24LKFA54
5'6" x 20 1/2" x 2 3/4"	33,3	24LKFA56
5'8" x 20 3/4" x 2 3/4"	38	24LKFA58
5'10" x 20 7/8" x 2 3/4"	39	24LKFA510
6'0" x 21 1/16" x 2 7/8"	40	24LKFA60

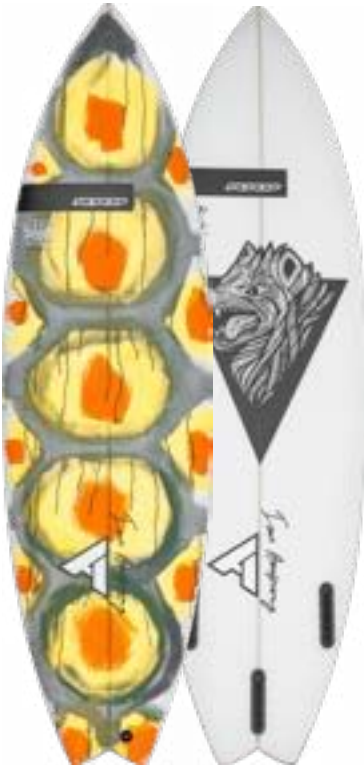

LUCKY FISH

TWIN FIN FISH

The Lucky Fish has instant acceleration with a turbo boost from the volume under the back foot. This board stays on the rail because of the smooth outline. It has a light single into double concave running into a deep V in the tail. Great for marginal surf as well. Designed to be 6" shorter than the rider. This is where the past meets the future.

YELLOW TAIL

PINTAIL WINGER SINGLE FIN

The Yellow Tail is a single fin classic from the seventies. With a double concave to give it a more modern feeling. Ride 3" longer than your height.

It has a flat deck and a full nose which makes it a great paddler. It can handle large surf and draws a pure line on the open face. This is the roots of modern surfing.

SIZE (inch.)	VOL.	ART. CODE
6'6" x 22 1/2" x 2 3/4"	48	24CRA66
7'0" x 22 1/2" x 2 3/4"	52	24CRA70
7'4" x 22 3/4" x 2 3/4"	55	24CRA74

CRAY FISH

MODERN MINITANKER

The Crayfish is a compressed longboard which makes it good for having fun in normal conditions. Easy paddling and speed make it a popular choice.

A wider board with lots of speed, it can be ridden as a single or thruster.

It turns and glides with ease.

INFLATABLE - SUP BOARD COLLECTION

Y E A R T W E N T Y F I V E

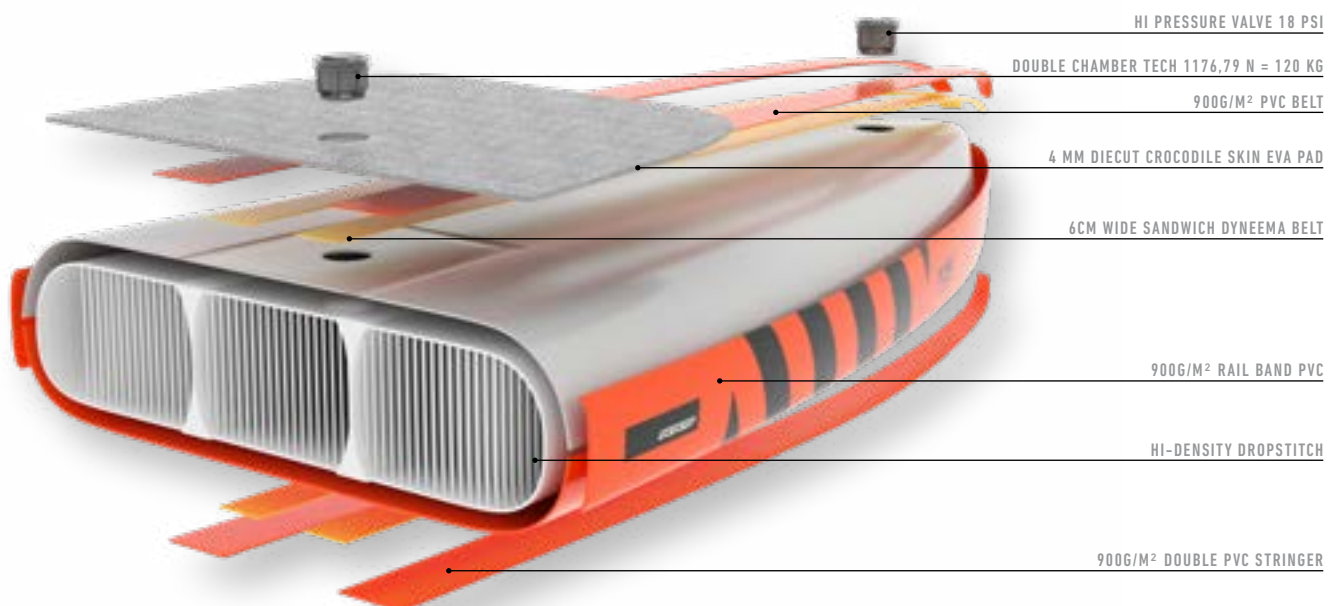

EVO

(Light Dropstitch + PVC Belt deck and bottom)

PRIME

(Sandwich Dyneema Belt deck and bottom)

After countless market surveys, we have decided to introduce the EVO series to our collection, a range of new inflatable Stand Up Paddle boards. This exciting technology brings a new level of price/performance, allowing everyone to enjoy this beautiful sport.

An inflatable board suitable for multiple type of riders, from beginners to expert looking for a multi-purpose freeride board.

The Single Light Dropstitch layer, which can be inflated up to 18 PSI, is covered by an additional PVC stripe called Copper Roll, to keep the correct shape over the time.

The Evo line is available in two different categories: AIR EVO and AIR EVO CONVERTIBLE.

Air Evo is an ideal inflatable board to get into stand up paddling and offers great stability and maneuverability. The Air Evo Convertible is the most appropriate type of SUP board to learn windsurfing. With its generous width, it makes it super easy for anyone to step on, paddle, or uphaul a sail.

EVO

TECHNOLOGY

EVO

The "Prime Quality" gives the rider a pure sensation of gliding and stiffness similar to a composite board. The Single Light Dropstitch layer, which can be inflated up to 18 PSI, is built with a pre-laminated double layer light dropstitch to keep the correct shape in any conditions.

The additional PVC layer, positioned on the top and bottom of the board gives it a fresh look and offers an additional protection from scratches and impacts.

All the prime collection boards are made with the Sandwich Dyneema Belt (SDB System) technology that wraps the whole contour of the board on the deck and bottom as a stringer create a 30% stiffer structure than on any other conventional inflatable board.

The diecut crocodile skin Eva pad, positioned on the standing area, will make your sup session dry and comfortable.

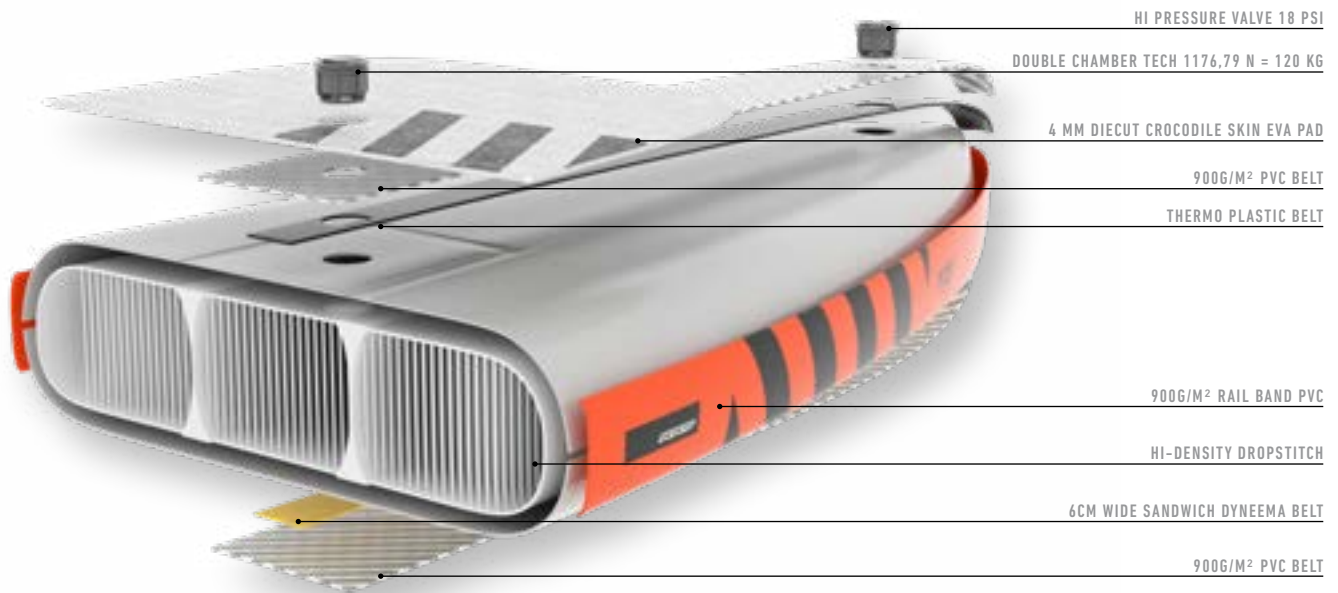

PRIME

TECHNOLOGY

SDB

PERFO

(Thermo Plastic Belt + Sandwich Dyneema Belt)

HI-PERFO

(Thermo Plastic Belt + Sandwich Dyneema Belt + Antitorx)

After the big success of the AIR RACE V3, we have developed a new technology to obtain an even higher performance boards range.

This new technology is called TPB (Thermo Plastic Belt).

Both the introduction of this new special technology (TPB) on the top of the board, and the positioning of the SDB (Sandwich Dyneema Belt) at the bottom, create a 50% stiffer structure than on any other conventional inflatable board.

The TPB is a special fiber glass stringer that works only while compressed. This is the reason why, after many tests, the R&D department has decided to place the TPB on the top of the board and the SDB at the bottom.

The balanced shape with a wider tail combines stability with speed and makes the ride easy and accessible to everyone.

Thanks to the PVC edge soft rail, positioned 60cm under the boards tail, water flows away fast and clean without major turbulences.

This new range of boards will make you glide on water, giving you the maximum efficiency, stroke after stroke.

PERFO TECHNOLOGY

SDB

A special technology conceived only for pro racers. The stiffness of the PERFO quality mixed up with the ANTITORX system create an extraordinary result, especially in downwind and upwind races.

The "ANTITORX" is a special system built with two 3cm wide TPB stringers (Thermo Plastic Belt) crossed over in a biaxial direction to prevent possible twist of the board, especially when riding in choppy conditions.

The two TPB plates under the first layer of the copper roll printed PVC ensure maximum comfort and reactivity also during the long-distance races.

Thanks to the PVC edge soft rail, positioned 60cm under the boards tail, water flows away fast and clean without major turbulences.

Try it to believe it!

HI- PERFO TECHNOLOGY

SDB

ANTITORX

AIR EVO

The split crocodile eva pad make keeps the weight of board down, and the new diamond low-profile PVC tail pad guarantees best grip in case of radical change of direction.

- **Ultra light PVC**
- **Diamond PVC pad**
- **Double chamber for total safety**

AIR EVO CONV

ALLROUND / WINDSUP

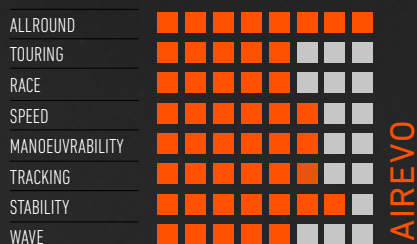

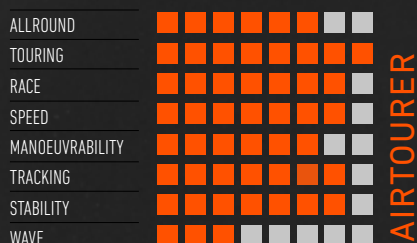

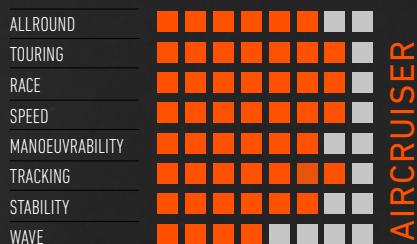

The EVO CONVERTIBLE line can become the perfect companion of your first windsurfing days. You can SUP this board as well as WINDSURF it.

Light, stable, easy to carry and to be stored back in its carry bag. Built only with the strongest and longer lasting and ultra light DROPSTITCH fabrics available today, the EVO CONVERTIBLE boards are the perfect choice for you and your family to start approaching Windsurfing and Sup with one board for all!

All the Evo Conv models are equipped with one 35 cm wide "click-on" center fin system to stay upwind and one standard US box fin on the tail of the board.

The second air chamber offers extra safety floatation for any emergencies.

- **Convertible Sup to windsurf board**
- **"Click-on" fin system to stay upwind**
- **EVO tech with double PVC stringer on top and bottom**
- **Double chamber for total safety**

AIR SUP

ALLROUND

Easy, light and fast to set up, the AIR SUP Y25 is the most wanted SUP range of our collection. This super friendly and all-round orientated type of board glides smoothly on flat water and rides effortlessly in small surf, allowing you to enter a new dimension of excitement. Rocker and scoopline together with a perfect fin placement allow for a great experience of pleasure in an incredible variety of conditions. Built with a new "Sandwich Dyneema Belt" two stripe on the deck and two stripe on bottom that wraps the whole contour of the board, it's becomes about 60% stiffer than any conventional inflatable board.

The EVA kick pad positioned on the tail ensure the perfect grip during the direction changes..

The second chamber also offers extra safety floatation for any emergencies.

- **Averagely 33" wide. The perfect width for INFLASUPS**
- **Versatile round nose and tail.**
- **Stable and maneuverable at the same time**
- **Double chamber for total safety**

INFLATABLE BOARDS

THE HUB / SWIM PLATFORM

YOGA/FITNESS

The HUB is a stable yoga platform that enables a Yoga or Fitness teacher to comfortably sit on the soft EVA deck and teach. It is equipped with 16 attachment "D" Rings on the deck that allow 8 boards to fit at the same time. The HUB also features 2 "D" Rings on the hull of the platform that enable it to be anchored. It's a real must for SUP schools, fitness centers and resorts equipped with SUP boards. Improve your yoga experience!

The RRD Swim Platform is the perfect yoga platform for any type of user. It is equipped with 6 D-Ring attachments on the deck and another 2 on the bottom to be fixed everywhere.

The platform surface is mostly covered by 6 mm of Crocodile Antiskid Waterproof Eva Pads to ensure maximum grip and comfort during any activities, like intense yoga sessions for example.

The elastic rope positioned on the nose is perfect to suit any kind of tools or gadgets that can be used during activities.

The rectangular shape of 250 cm x 100 cm is a great size for many swimming pools as well. Inflate your water experience!

COMPACT SUP SAIL

WINDSUPPING

The ever popular Supsail just got compact. We applied all our development in the compact series to the Supsail to make possibly the smallest rigid windsurf rig ever. If you want a sail to pack up small and take advantage of those summer breezes the compact Supsail is the perfect solution.

- The ever popular Supsail just got even more portable
- Utilising our compact technology we made the Supsail fit in a backpack
- For families and Suppers who want to continue to enjoy the water when the wind picks up

FEATURES

- Simple design – 1 or 2 batten design for simplicity and ease of rigging
- Reduced rig pack size, can easily be carried on the back.
- Mechanical UJ – Specially designed for use with a SUP.
- Smallest size fits in less than 70cm high backpack.

OURER

AIRACE

RACE

Can you imagine being able to go as fast on an inflatable board as you can on a full carbon board?

This is what the AIRACE Y25 shapes do. Stable, practical, and furiously fast!

The special narrow nose and straight outline design combined with a 6" profile thickness and a super flat scoop rocker line, creates the perfect recipe for a great competitive board to be used for flat water races or simply for pure pleasure fast rides. Now available into 5 different sizes! Built with a new SDB "Sandwich Dyneema Belt" on bottom and TPB "Thermo Plastic Belt" on the deck that wraps the whole contour of the board from the deck to the bottom as a stringer, the board becomes about 50% stiffer than any conventional inflatable board. Thanks to the experience of our sup racers Paolo Marconi and Susak Molinero, we decided to add a new "Antitorx System" technology this year that prevents any twist of it, especially during the extreme upwind and downwind race. The TPB plates positioned under the standing area ensure maximum comfort and reactivity. This year we have increased the stability of about 30% more thanks to the new eva pad design and surface variety on the standing area. The new eva grip provides more control and more maneuverability during the race, especially in upwind and downwind.

- **Antitorx Technology**
- **Soft sharp tail & rail pvc edge**
- **Special Eva standing area grip**
- **Double chamber for total safety**

FEATURES:

- Oval shaft
- T-Handle
- 3-Concaves

The **DYNAMIC PRO RACE** series is developed only for racers. It is available in two different sizes M (85 SQI) and L (92 SQI). These paddles are developed to have the maximum amount of stability during the power application. Built with a CNC shaped high density PVC core blade and laminated in full carbon, the weight is around 480 gr. The Dynamic Pro Race Paddle is ideal for long distance racing and down winders. The Three-deep concave in the middle of the blade adds stability to the stroke while eliminating blade flutter. The ABS rail insert along the entire edge gives to the blade durability and prevents damage on the boards rails.

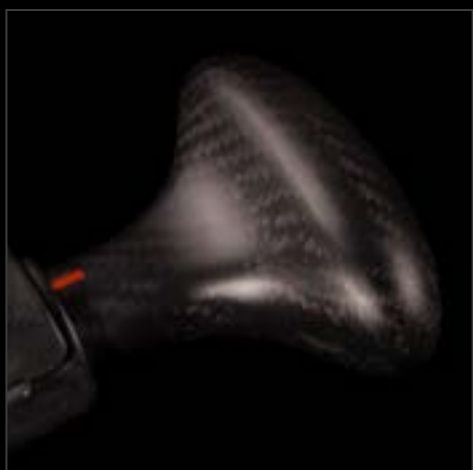

2 PIN LOCK SYSTEM

All the adjustable RRD paddle are equipped with the new two pin block clamp. This new block allows a perfect closure between the inner handle tube and the shaft.

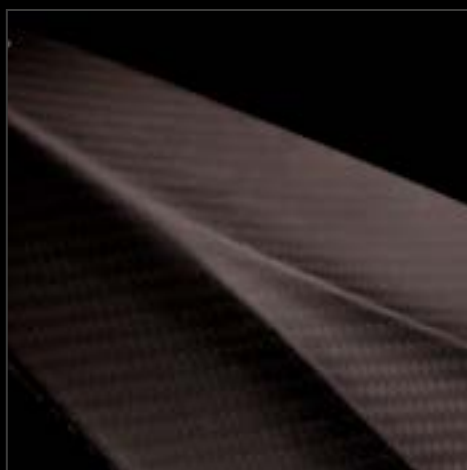

ANTITWIST RAIL

A total new design to fix the inner shaft on the ADJ paddle. The new RRD anti TWIST inner shaft ensures that the handle and the blade are always lined up correctly. All of our models are equipped with the Anti-Twist system.

T-HANDLE

The shape allows maximum energy transfer and comfort during long periods paddling. Perfect for beach-race and long-distance race.

V-SPON

Conceived to guarantee the perfect stability during the power application. The results offer very stable, effective power during the stroke phase with super fast exit. Great for catching waves, racing, and touring.

ABS RAIL

2 cm thick abs profile along the paddle blade outline to prevent damage on the rail of the board

OVAL SHAFT

The new RRD Dynamic pro race paddle M and L are available with the new oval full carbon shaft. Precise and controlled grip shaped to naturally fit in hand for the most direct tracking and alignment.

DYNAMIC PRO

The DYNAMIC PRO RACE series is developed only for racers. It is available in two different sizes M (85 SQI) and L (92 SQI). These paddles are developed to have the maximum amount of stability during the stroke. Built with a CNC shaped high density PVC core blade and laminated with full carbon wrap; the weight is around 460 gr. The Dynamic Pro Race Paddle is ideal for long distance racing and down winders. The triple deep concave shape in the middle of the blade adds stability to the stroke while eliminating blade flutter. The ABS rail insert along the entire edge greatly improves to the blade durability and prevents damage on the board rails.

Performance, balance and maximum grip down the line, these are the three main characteristics of this paddle.

The full Carbon blade and shaft allows the four phases of the stroke come to life.

A full carbon paddle conceived for your full speed take-off in all kind of waves.

Get the comfort and response your wave riding demands thanks to its super light weight of only 480gr. Built with a CNC shaped high density PVC core blade and laminated with full carbon wrap. The ABS rail insert along the entire edge enhance to the blade durability and prevent damage on the board rails.

PRO WAVE

DYNAMIC

The paddle blade has been thoughtfully designed to maximize all four phases of the stroke, especially when the paddle is pulled towards the standing area. The ergonomic handle gives the best grip possible while the small surface of the blade (92 SQI) is great for paddling at a higher stroke rate, allowing the rider to use less power during long stand up paddling sessions. Our anti twist system on the adjustable shaft will keep the handle in the perfect angle at all times.

- **80% carbon blade and shaft, advanced riders**
- **V shape**
- **92 SQI blade**

FLOW

The FLOW series is the perfect tool to improve your paddling technique. A full glass fiber paddle, CNC shaped with a high density PVC core blade, available in 2 or 3 pieces. The blade is designed with a rigid spine positioned in the middle of the blade to speed up the water flow during the stroke. The surface of the blade is 92 SQI and it has an ABS rail around the entire edge perimeter of the blade to prevent damage on the board rails. It's equipped with the new two pin lock anti twist clamp. Thanks to its versatile shape it can be shared amongst family and friend.

A compact SUP paddle for riders who want the ultimate in convenience and storage without compromising on performance.

The flow travel paddle is a 4 piece paddle. A full glass fiber paddle, with a CNC shaped high density PVC blade core. Our mission is to make SUP more accessible.

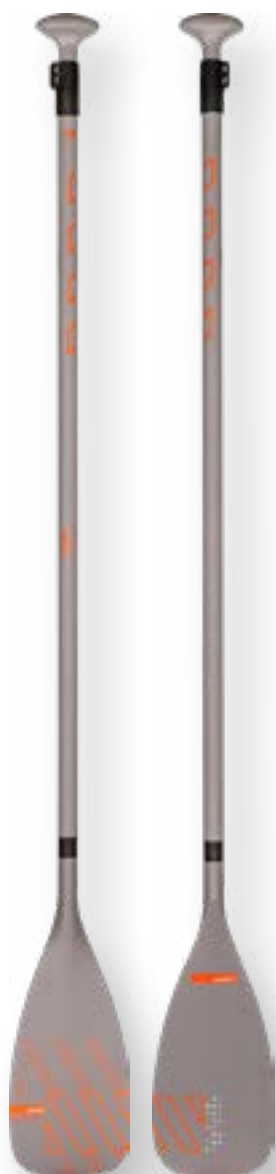

The flow travel paddle has an extremely tough fiberglass shaft and fully reinforced fiberglass blade that's ideal for an easy of stroke flow. The blade size of 92 SQL is appropriate both for children or adults. The 4 pc shaft can also be assembled only by using 3 pieces, creating a much shorter length for children's use.

EASY

ENTRY LEVEL

This category of paddle is developed for entry level riders. Available as standard adjustable or 3 pieces shaft.

The blade is made with fiberglass loaded polymers with a surface of 100 SQI.

The blade shape has a special prism-like concave to create both a stiff structure and an efficient water flow. The full glass shaft guarantees a light weight and a correct flex on every stroke. This paddle is the top choice for anyone that wants to go from zero to hero! The Easy paddle is also available in a KID size with a narrow diameter shaft (26mm) and a special square blade of 76 SQI.

START

SCHOOL

This paddle family is developed for SUP Schools and SUP rentals. The START PADDLES are available in 2 or 3 pieces.

The blade is made with fiberglass loaded polymers with a surface of 100 SQI.

The blade shape has a special prism-like concave to create both a stiff structure and an efficient water flow.

We give you the possibility to stay on a budget with the aluminum shaft and thanks to the adjustable range of 165 – 215 cm ensure a perfect set up for any size rider.

HAND COMPRESSORS

The new Hand compressor pump is a multiple inflating system pump that can act in two modes:
Mode 1 or HIGH CAPACITY mode, or a double action mode of 2.1+2.1 lts where you can inflate your board from 0 up to 18 PSI of pressure .
Mode 2 or HIGH PRESSURE mode or single action mode of 1,8 lts, where you can pump up to 29 PSI of pressure. (maximum inflating pressure on your board should be 18 PSI).
The mode 2 is recommended only for kids or lightweight girls in order to help inflating your board up to 18 PSI of pressure requiring less power on your arms.

Auto adjust inflation tube

HAND COMPRESSOR

LEASHES

The new RRD leash is designed to offer minimal resistance for flat water and open ocean paddling. The leashes are available in 6'0", 7'0", 8'0", 9'0" in length of urethane cord.

Wide Neoprene Cuff With Quick Release.

Respect other paddlers and have peace of mind knowing your paddle Board is close by during any spills or swims you may take. The coil 10'0" X 8MM leash eliminates any slack a traditional straight leash might normally have.

SURF / SUP LEASHES
